LinkedIn: linkedin.com/in/laiba-rashid-571634290 | Portfolio: portfolio-nu-beryl-92.vercel.app

Professional Experience | Industry Experience: 2.5 Years

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, FastAPI, Php, Laravel

Databases & ORMs: PostgreSQL, MySQL, MongoDB, Prisma, Sequelize

APIs & Real-Time Communication: RESTful APIs, Socket.IO, API Integration

AI & LLM Integration: OpenAI API, LandingAI, ElevenLabs, Prompt Engineering, LLM Integration, AI Application Development

Payments: Stripe, Bitcart (Cryptocurrency Payment Processing)

DevOps & Tools: Docker, GitHub Actions, CI/CD

Security & Architecture: Authentication & Authorization, Performance Optimization

ACHIEVEMENTS

- Optimized application performance by reducing API response times and improving page load speeds across full-stack applications, enhancing overall user experience.
- Integrated third-party payment gateways, including Stripe and cryptocurrency payment processors, to enable seamless and secure transactional checkouts.
- Integrated LandingAI for intelligent document parsing, enabling automated extraction of structured data from PDFs and images and using it to auto-populate corresponding form fields.
- Integrated ElevenLabs conversational AI agents into applications, enabling voice-based chat agents for automated, natural-sounding customer interactions.

PROJECTS

CitimedOvada.com — Deline Media

Duration: 1.5 Years Exposure

- A UK-based hospital management system handling patient registration, accident cases, insurance claims, doctor appointments, billing, and medical records.
- Includes modules for medical equipment requests with integrated pickup and delivery apps for home-based patient support.

POS (repairdesk.co) — RepairDesk

Duration: 1 Year Exposure

- A repair shop management and POS system built for RepairDesk, supporting device intake, ticket management, inventory control, sales processing, payment handling, employee management, and workflow automation — powered by 50+ integrations to streamline repair operations end-to-end.

Trust Launch | AI / SaaS Compliance Platform — Devflowv

Duration: 1 Year Exposure

- Developed a full-stack trust-verification platform for secure document compliance and onboarding.
- Built Node.js/Express APIs with Sequelize ORM and PostgreSQL, with an OpenAI-powered document parsing pipeline.
- Implemented Dockerized deployment for consistent and scalable application delivery.
- Live Demo: trustlaunchai.com

EDUCATION

Bachelor of Science in Information Technology (BSIT)

Government College University, Lahore | 2022 – 2026

CERTIFICATION

Web Development Certificate – Istta Institute | March 2024
