

LAIBA RASHID

Associate Software Engineer

0302-3544407 | laibarashid2711@gmail.com | Lahore
GitHub: <https://github.com/Laiba2711> | LinkedIn: <https://www.linkedin.com/in/laiba-rashid-571634290>

Professional Summary

Associate Software Engineer with experience in building scalable full-stack web applications using TypeScript, Next.js, React.js, Node.js, PostgreSQL, MongoDB, and Docker. Skilled in designing REST APIs, real-time systems, payment integrations, and responsive user experiences. Passionate about solving complex problems, optimizing performance, and delivering production-ready solutions.

Skills

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, Socket.IO, Authentication & Authorization
- **Database & ORM:** PostgreSQL, MongoDB, Prisma ORM, Mongoose ODM, MySQL
- **Tools & Platforms:** Git, GitHub, Docker, Postman, Stripe API, Bitcart, Render, Vercel
- **Core Concepts:** MERN Stack, PERN Stack, Real-Time Applications, API Integration, Full-Stack Development, Performance Optimization

Professional Experience

Associate Software Engineer

Devflovv (Coding Pulse), Lahore | Oct 2025 – Jun 2026

- Developed scalable full-stack applications using **TypeScript, Next.js, React.js, Node.js, PostgreSQL, and MongoDB** for client-based solutions.
- Designed and integrated **REST APIs**, improving application efficiency and secure data handling.
- Collaborated with teams to implement new features, debug production issues, and optimize performance.
- Contributed to deployment workflows using **Dockerized environments**, ensuring scalability.

Projects

Trust Launch (AI/SaaS Compliance Platform) – PostgreSQL + Node.js + Next.js + Docker

- Developed a full-stack SaaS trust-verification platform for secure document compliance and onboarding using TypeScript architecture. Built scalable Node.js/Express APIs with Sequelize ORM and PostgreSQL, and integrated an OpenAI-powered document parsing pipeline with Dockerized deployment for scalability and consistency.
- Live Demo: <https://trustlaunchai.com>

Satoshibin (Crypto/Web Platform) – PostgreSQL + Node.js + React + Docker

- Developed a full-stack digital asset platform for secure file monetization through Bitcoin payments using PERN architecture. Built scalable Node.js/Express APIs with Prisma ORM and PostgreSQL, and integrated Bitcart with Dockerized deployment for scalability and consistency.
- Live Demo: <https://satoshibin.com/>

UnityEats – Real-Time Collaborative Food Delivery Platform

Tech Stack: Next.js 14, Node.js, Express.js, Socket.IO, Prisma ORM, PostgreSQL, Stripe

- Built a real-time collaborative food delivery platform using Next.js, React, Node.js, and Express with Prisma and PostgreSQL for scalable backend APIs. Integrated Socket.IO for live group cart synchronization and Stripe for secure payments and checkout processing.

Interactive 3D Space Exploration Portal (React + WebGL + GSAP)

- Developed and optimized an immersive 3D space-themed landing page using React, React Three Fiber, Drei, and Vite. Implemented responsive 3D planet rendering with orbital textures, real-time lighting, emissive maps, and cursor-based parallax animations with smooth LERP effects. Enhanced performance through async asset loading, GSAP and Framer Motion transitions.
- Live Demo: <https://space-landing-h6li.vercel.app/>

Education

Bachelor of Science in Information Technology (BSIT)

Government College University

Certificate

Web Development Certificate – March 2025
